

Submitter: Todd Downer

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

It never ceases to amaze me that legislation is drafted without consideration of the Founders Papers who drafted the Constitution of the United States. Further, the committee and judicial appointees boldly cross the line that even the Supreme Court dared not in 1801 when they concluded any law against this Constitution.

How evident HB 3075 is an abuse of power against "We the People" when the real criminals like Soro's backed Black Lives Matter and other miscreants are allowed to roam the streets of Portland threatening lives.

And somehow this is justified through your oath of office to protect the people and uphold our inalienable rights. SHAME ON YOU ALL.

The Founders were right our fight is you in government as you continue to assault our liberty.

HB 3075 and M114 are nothing more than legislators putting lip stick on a pig and turning blind eyes to the real problems and those causing.

Oppose both HB 3075 and M114.
