Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

Honorable men and women serving at our capital.

Switzerland requires their citizens to be familiar with and manage guns. They're incident of death by guns is very low. The mystique and mystery of the gun is taken away. The fear of using a gun is reduced. A gun is to protect us.

Why would you punish those who are abiding the law by allowing them to become more vulnerable to those who do not. Those who do not follow the law with guns will not honor any of the regulations you create.

In fact, most guns held by criminals they stole from someone who followed the law. I and they carried them from other states.

I oppose it for the safety of my children and my grandchildren and their children
