Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

Please don't pass this bill.

Passing this bill only hurts law abiding citizens and does nothing to improve firearm safety.

I grew up hunting and farming and target practicing with my family.

It is the way we feed ourselves, how we cull an injured animal and how we would defend our property from would-be burglars.

Our public wildlife management also depends on guns. The ability to hunt to manage wildlife and the huge amount of income received from gun and ammunition sales would stop going to wildlife management agencies.

Again, gun control only hurts the law abiding citizens and does nothing but make us powerless against criminals and foreign governments!
