

Submitter: Karl Clement

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

While this is an amendment in regards to ballot measure 114, it should at least include a Fiscal impact statement. As well as covering financial damages for small business FFL's that will effectively lose all business on July 1, 2026 if a Permit to purchase program isn't put into place across the entire state. Additionally, there should be another amendment to grant special law enforcement protection to individuals seeking self protection that are in fear for their life, that are awaiting for their permit to be approved to buy a firearm for self protection. Even further, there should be a grant system that pays for the permit for people with low socio economic status. If the Oregon Government intends to deny Oregonians of their right to bear arms in a timely matter, the Oregon Government is now responsible for all instances where denying a firearm to a law abiding citizen in a timely causes severe bodily harm or worse.
