

## Testimony

Hello, thank you for taking the time to read this. I oppose HB 3075 for the year 2025.

This is a very poorly written bill by people who don't understand firearms and their uses but only see some of the damage done with them. Secondly the fiscal responsibility and fiscal impact this bill will create is not even been truly addressed.

I am not a second amendment lawyer so don't know fancy terminology for everything, but I do know that this bill hinders law abiding citizens and lets those who fear something they don't know or understand take things too far. I am amazed at how law abiding citizens keep getting punished for the infractions of a few.

That being said, the bill has passed, so I must speak on how irresponsibly fiscal this bill is. Without there being a system in place, even in a temporary trial period, there is no way to calculate the financial impact this will have on our State. Computer systems, office space, personnel, maintenance, and so on.

In addition to fiscal responsibility, there is little precedence for who will have say on costs for legal gun buyers and who will be able to addendum the rules.

Overall, this house bill was not created with the proper respect and due diligence that is needed for a law.

Thank you for your time,

Retired Army Sergeant First Class Karl Gatke
