

Submitter: Jennifer Walker

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Please listen to us when we say we cannot afford any new taxes, especially transportation taxes. There needs to be an audit done on the spending, I am certain you can find some waste and better management opportunities. We are spread so thin that if we must pay more in one area then we will have to default in another, and no family can choose between paying for food, electricity or transportation. We have to carefully manage our own funds in order to pay for it all. Government entities need to do the same.
