On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Dear Friends

I have but my legs and TriMet for transportation, like my neighbors and most of my friends we depend on TriMet for getting to the doctor, grocery stores, community events, etc..

Currently the TriMet service has curtailed or removed enough routes and stops that, as compared to a year ago, my waiting and travel time have increased for each trip by a minimum of 20%, and due to closed stops I can't even make many of my scheduled trips.

Uber, etc., are useless to me, and I have no other option for transportation than TriMet.

Please at least return the TriMet service and routes to their previous schedules and increase the number of potential bus-stops so that we can all have realistic access to the buses and trains!

Sincerely,

William K. Maddox

Tigard
