

Submitter: Ed Capelle

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I am fully and completely opposed to HB 2025. As a resident of Oregon for more than 24 years, one thing with our representatives is clear.....when they are unable to budget well, they plug shortages by raising taxes. Oregonians have suffered in recent years with inflation that was driven by policies of the democrats and the past president. We can not continue to shoulder the cost of poor management by our elected representatives. HB 2025 would cause a significant increase in the cost of gas, which is already so much higher than other states. Learn the most important rule of budgeting.....cut expenses. I urge you to vote no on HB 2025
