

Submitter: Barbara Bryson
On Behalf Of: Wildlife Crossing bill
Committee: Joint Committee On Transportation Reinvestment
Measure, Appointment or Topic: HB2025

Dear Co-Chairs Gorsek and McLain, Co-Vice Chairs Starr and Boshart Davis, and Members of the Committee,

Please support HB 2025 Sections 111 and 117, which establish the Oregon Department of Transportation (ODOT) Wildlife-Vehicle Collision Reduction Fund at an annual rate of \$10 million per biennium.

Many vulnerable wildlife species are killed in vehicle collisions every year on our roadways. This includes species like Pacific marten and wolves. It also includes important game species such as the mule deer. In fact mule deer are the most commonly hit animal in Oregon and its population has declined by over 50% in recent years. Habitat loss makes it necessary for wildlife to cross highways, which pose a significant danger.

Wildlife-vehicle collisions also hurt people. According to ODOT, there are over 7,000 collisions per year resulting in over 500 serious human injuries and four fatalities. This is the highest rate among West Coast states. Millions of dollars of damage are incurred every year from such collisions. The good news is that we know that wildlife crossings work. The Lava Butte underpass on HWY 97 in central Oregon has reduced deer collisions by over 90% since construction.

HB 2025 Sections 111 and 117 build upon past efforts of the Legislature to address the problem of the loss of wildlife connectivity and the high rate of wildlife-vehicle collisions by establishing and sustainably funding the "Wildlife-Vehicle Collision Reduction Fund." This would be a significant step in addressing the safety and environmental consequences of habitat fragmentation caused by roadways and would position Oregon alongside Utah as the only state with annual funding for wildlife crossings.

Please strongly consider this request!

Sincerely,

Barbara Bryson
Eugene, Oregon
