

Submitter: Dan Hermansen

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I respectfully oppose this measure. The Legislature gets so caught up in attempting to solve funding issues in a short time they take the easy way out by increasing fees, taxes and other rates. Look at the real cause first, vehicle registrations as an example. Enforce the renewal of these vehicles first and work to collect what is owed the state in other areas. Once this is done cut non essential budget items that the state is not required by the State Constitution to fund. Those of us who do renew our vehicles and pay our fees are the ones affected by these increases. I see literally dozens of expired vehicle registrations many which are 2-5 years expired. Do not take the easy way out by raising fees, taxes and rates

Thank you. Respectfully

Dan Hermansen
