

Submitter: Lee Littlewood

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Because transportation is the largest source of climate emissions in Oregon, it's critical to the future of our climate that we support increased electrification. Funding for Community Charging Rebates and the Zero Emission Fueling Program brings key charging infrastructure to rural and underrepresented communities. Please push for more electric vehicles for more people, and especially for more charging stations around the state.
