

Submitter: Michael Johnson
On Behalf Of: Cavco Industries
Committee: Joint Committee On Transportation Reinvestment
Measure, Appointment or Topic: HB2025

To whom it may concern,

I strongly oppose another tax which targets the affordable housing sector of America. Factory-built (Manufactured Homes) provide home ownership to thousands of families per year. Without affordable housing, we are going to deprive middle income families, including seniors away from ever owning a home and being part of being an American and the American dream. WE CAN'T AFFORD continuous tax increases to the best home option available for many. I STRONGLY OPPOSE HB2025. The lawmakers making these decisions are crippling home purchasing power for the masses and serving the few.

Sincerely,

Michael Johnson
