

Submitter: Ryder Booth

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

My name is Ryder Booth. I'm a 19 year old student at Pacific Northwest College of Art in Portland. I walk, bike, and take the bus.

The climate crisis is here yet we fail to do enough if anything about it.

While this package funds things like public transit and safe walking and biking (yay!) it fails to adequately address vehicles role in pollution and emissions (boo!).

Fees and cost increases for the poor and middle class are not the ways to address our transportation needs. Tax luxury cars, the rich, and corporations so that we can have transit that is fast, safe, and reliable.

I beg you to please prioritize my and my generations future!
