

Submitter: Jeanette Eyman
On Behalf Of: self
Committee: Joint Committee On Transportation Reinvestment
Measure, Appointment or Topic: HB2025

To whoever is on this transportation committee:

From everything that I have read and heard, this bill raises taxes on just about everything in the State of Oregon to give the ODOT card blanc, with no accountability for how they have spent the money that they have been given in the past! You pass all these taxes, and you better be ready for the public to recall the bill, and then where will you be??

You don't seem to understand that the majority of the citizens of this state do not live in Portland, Eugene or Salem... we live in rural areas where most don't have access to the charging stations that you seem to think we should be using. We also work in those cities and will oppose any and all tolling that ODOT will try to force down our necks.

I would think that you would want cooperation from the citizens that you supposedly represent, but apparently you don't care.
