

Link Oregon

Link Oregon is Oregon's non-profit, member-led fiber optic broadband network serving education, research, government, and community institutions. We operate more than 2,500 route miles of high-capacity fiber, connecting 45+ member organizations and delivering a comprehensive suite of services. Beyond network operations, we also lead statewide collaborations advancing broadband policy, digital equity, and research infrastructure for Oregon's future.

Community

Community is at the heart of Link Oregon's mission – we don't just build networks, we build connections. Through our communities of practice, annual member meeting, and ongoing collaborations, we foster relationships that strengthen Oregon's digital ecosystem and drive shared progress statewide.

Driving Oregon Forward

Link Oregon is more than a network—we're a catalyst for innovation and collaboration. Through our member communities, partnerships, and statewide initiatives, we connect people and institutions to drive meaningful impact. Together, we are building the digital foundation for Oregon's future.
