EFFECT OF AMENDMENT:

No amendment.

BACKGROUND:

The Congressional Research Service [reports](#) that nationally, assets held by banks have increased but the number of banks has decreased since the 1980s. The decline is a result of consolidation through mergers and acquisitions, as well as failures. The formation of new banks has declined significantly after the 2007-2009 financial crisis, though nationally applications for new bank charters have more recently increased.

The Department of Consumer and Business Services, Division of Financial Regulation [lists](#) twelve state chartered banks, with the most recent being listed as chartered in 2006.
