Measure, Appointment or Topic: HB4145

Once again a backroom deal has been brokered to disarm law abiding citizens

The bad faith effort is apparent in those trying to ram this act forward by allowing only one day of testimony after announcing this public hearing on a weekend.

This bill would instantly make criminals of law abiding citizens who have legally purchased components and retroactively punishes citizens.

Guilt is assumed and innocence must be proven under the current writing of the law.

The pricing updates disproportionately effects those of lower socioeconomic standing and targets POC in a clearly racially motivated barrier to entry in exercising ones rights. The rights guaranteed to citizens of all races, religions, orientations and creeds.

The changes listed here creates a caste based system of citizen based on employment/previous employment.

The hypocrisy is evident as you call for de-policing yet the police are the only ones who can be permitted to possess certain critical elements of a firearm.

I am opposed to this update and BM114 as a whole.
