

Submitter:

Christen Chandler

On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

This bill is unconstitutional and everyone on the committee knows. The lawsuits on 114 are still undecided and yet this dictatorship in Salem continues to defy the courts and the constitution. Please fix the ODOT problems like you promised the public. Please fix the other things that you promised before taking this up on the first day. All across the country these kind of laws are being struck down and still the queen and dictators introduce these unconstitutional bills. I know it does no good to submit testimony and not one person on this committee or the legislature cares. They still pass laws like the transportation package against the will of the people. This bill is just another in a long, long list of laws that Salem passes against the will of the people.
