Measure, Appointment or Topic:

HB4145

Restricting gun rights is fundamentally against the constitution. If you look at where the majority of this gun violence comes from, you will see it's in your blue cities. Most of the shooting at murders are gang related. Restricting citizens who have no felonies, pay their taxes, and work hard is unconstitutional as these rights were given by God. The state continues to waste money, time, and effort on an issue that in the end has nothing to do with us legal owners. To think you are fixing the problem when we are not the issue is insane at best and evil.
