Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

The thought that some people (the general population) have less freedom to protect themselves and the ones they love, than a person with a badge does is not right. We should not be limited on what we use to defend ourselves compared to any LEO. If we have to have limited capacity magazines they should too. Though we should not be limited in the first place. It's a feel good law based on no meritable study. We also should not have to submit to purchase permits, especially one at the whims of a police force. It will put a limit on who can defend themselves by cost and or race/religion.
