Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

I strongly oppose this bill. As a lifelong resident of Oregon I've seen gun rights being diminished little by little and it's done nothing to make anyone safer it has only served to infringe on the second amendment rights of law abiding Oregonians. Meanwhile leadership has taken a soft on crime Approach to justice, ignoring victims and showing favor to violent repeat offenders making every Oregonian less safe. Oregon law makers need to be fired they're failing the state, so much so that counties want to leave the state. This current legislative body is doing more harm, only harm really, causing the state to suffer. Instead of trying to infringe on the constitutional rights of Oregonians the state should be working to lower costs like the much more prosperous republican led states that do many Oregonians have moved to and continue moving to. Governor kotek has failed the state and Oregonians continue to struggle under her failed leadership and that of the states democrat party. This bill is a continuation of that failed leadership and should be rejected. Oregonians want lower cost of living not unconstitutional laws that will ultimately cost the tax payers millions of dollars in court costs and will likely be struck down by the Supreme Court of the United States. I oppose and so does every person I know. Oregonians didn't ask for our rights to be trampled we want a functional state and a competent government, we have neither currently.
