Measure, Appointment or Topic:

HB4145

It is absolutely ridiculous that Oregon Legislature continues to attempt to infringe on law abiding citizens' second amendments right. NO END RUN will work. Read the Bruin case ruling by the supreme court. There is no long-standing precedence for the provisions of this bill or all of the other attempts. QUIT WASTING TIME. Oregon has bigger problems, like the budget, the crumbling road infrastructure, poorly handled criminal justice, over taxation, a the FACT that Oregon schools are not preparing young students for life. This is a bottom 10 in the nation state when it comes to education. FIX THAT. Mental illness cases casualty events, not tools like guns, knives and cars. The legislature should focus on treatment and education. Those could actually help. Your gun bills don't, and will be shot down by the Supreme Court, because they can read the constitution and understand what will not be infringed means.
