House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

As a concerned and active voting citizen, I have observed the deterioration of the federal governments response in seeking to dispossess my fellow Americans, regardless of background and affiliation from their rights to be free from unjustified and illegal investigations, their right to free speech, their right to vote in an election with full integrity, and increasingly, their right to own and utilize their second amendment rights. The state of Oregon must not follow suit, and seek to further price out Americans in this tumultuous time from their second amendment rights.
