Marjorie Nafziger

On Behalf Of:

Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4134

I urge support of HB 4134 for its benefits to agriculture (pollinators, ridding invasive species), creating healthier wildfire resilience, and the economic advantages of protecting species before they face extinction instead of desperately trying to bring them back. I applaud the fact that this is also a bipartisan proposal - another 'fragile, rare species' these days!
