Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4134

I support HB 4134 as this legislation protects wildlife and human health. Keeping nature healthy also keeps humans healthy. This legislation also both directly and indirectly protects Oregon's fish & wildlife, including but not limited to over 300 vulnerable species. It also protects and restores environmental areas that humans and animals alike rely on for livelihhod & quality of life. Oregon's department of fish and wildlife lacks stable funding, and this bill changes that. This bill is supported across party lines, and his a historic policy opportunity. This bill has my full support and I urge those voting on this bill to understand how important it is to pass.
