House Committee On Revenue

Measure, Appointment or Topic:

HB4134

Oregon's wildlife and wild places are deeply important, both for securing a necessary ecologic balance, which we must strive to protect in order to sustain a living biosphere, and to ensure the continuance of the attraction of the beauty that brings visitors to our region, which delights both us and visitors, and boosts our economy.

For these ends we require a healthy natural system which supports and benefits all the various wildlife and human communities, and promotes their interactions and well-being. If passed, 1.25% for Wildlife, HB 4134, would secure those objectives by protecting and conserving our most vulnerable wildlife. I urge you to support it and vote yes.
