

Submitter:	Jewell Marcee
On Behalf Of:	The children who are unable to speak for themselves
Committee:	House Committee On Judiciary
Measure, Appointment or Topic:	HB4088

My name is Jewell and I oppose HB 4088.

I am a Mother and a Grandmother and a Great Grandmother and I Love all my children. I know from my own experience that every life is very special and every child deserves to live. God has blessed me with all my children and I can't imagine life without any one of them. The thought of a child being aborted is heartbreaking and devastating and unthinkable to me. Children have rights too. If a child is unwanted by the mother then the child should be born and given to someone else who wants the child. Also, children change their minds often and that's because they're learning about themselves and their family and life in general. They are not capable of making decisions like their sex or anything else of such magnitude because they need to learn and grow and experience love from their parents. They don't need to be taught by their teachers about sex education but by their parents because this is what God intended. God didn't kill babies so who gave you the right to kill them.
