On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

I fully support HB4145. This measure was already passed by the voters years ago and it's time that it was finally enacted. We are required to get a permit to drive a car or even go fishing in Oregon. The least we can do to keep our families and communities safer is require background checks and permits with proper training for fire arms. This isn't about keeping people from having firearms, this about keeping us all safer by putting common sense measures in place. Prohibiting large capacity magazines and closing the Charleston Loophole is also so important. As someone who grew up in Central Oregon and always had access to guns I am still very much in support of this bill. I have lost people I care about to gun suicide, we are traumatized daily by the gun violence in our country and this culture needs to change. Every step forward to make us safer is absolutely necessary at this time. Honor the vote that already took place and put this into action.
