HB4125

Democrats in Oregon are interested in taxing Oregonians for every little issue. We see the police have their hands tied so they can't assist federal agents trying to make our state and country safe. Democrat lawmakers are in many cases promoting Oregonians to stand against ICE, but cite no reality based reasons for this. The federal government would give us the funds to help Oregon if we assist them in taking away sanctuary laws and assist with cleaning up our state. Veterans are about to have state parks special access pass reduced to almost nothing, stem classes will be shut down and ffa programs are on the chopping block. Each state department was asked to come up with 3-5% cuts so that Oregon could keep harboring illegal criminals who are not immigrants, but here illegally. By harboring and not allowing police and jails in Oregon to assist with the removal of illegals, Oregonians will continue to be squeezed dry to fill the funding gap in Oregon for all things we care about. Democrat values have slipped into dangerous territory where illegals are being prioritized over citizens, veterans, the elderly, our children...just so they will eventually get all illegals to have the ability to vote and be counted for census which would give them more representation. What about actual Oregonians and the representation we are supposed to enjoy from leaders in our state. Many of us feel devalued and used as an ATM machine for Democrat lawmakers. Do not take state parks away from Disabled Veterans so you can fill a federal funding void that directly benefits illegals. Telling Oregonians that schools will be defunded and programs everywhere must be cut because you've decided that votes from illegals will keep you indefinitely in control and will give you more seats in us congress. We the Oregonians you have been screwing over demand accountability for all of the money you have squandered on gender affirmation and lawsuits against the federal government over the enforcement of national laws that many of us agree with. How is it that Oregon lawmakers have not been audited from the governor all the way down? You want us to give up our kicker in the name of helping students in school when schools would have adequate funding, as would our veterans, elderly and disabled if the money wasn't stolen and given to illegals for free healthcare, subsistence checks and housing. Most of the homeless see on the streets are Americans, not illegals...make that make sense?! You should be ashamed to be representatives who have driven our state into the ground for votes from people who shouldn't be here, for letting Democrat socialists take control of your party and try to change the fabric of Oregon and the United States forever. That you would want your daughters growing up in a state with illegals who have and will rape them and discard them, but have no one out protesting for them; while promoting agitation and mercy for people who are sick in the head and want to see the fall of America. Stop giving gun legislation down our throat when you have given safe haven to illegals and

put Americans out on the street who now are theiving and making resident in Oregon feel unsafe. Stop saying your helping Oregon with new taxes when nothing you have done has positively impacted this state. We used to have signs everywhere to keep Oregon green and now it is a shithole around every city and no one cares about the trash along highways here. Priorities should be to exit illegals and get votes from your party the right way; get rid of the extremist takeover from progressive socialists and make your party great again, so there can be dialogue that positively impacts all of Oregon. Put Veterans and frontline workers in high regard again. We are assets to this state, but are being treated as burdens. Don't take away our kicker.
