Measure, Appointment or Topic: HB4007

As an almost daily bicycle rider, I would appreciate some parameters placed on these vehicles. They came on the scene practically overnight, with no regulations, so it only makes sense to create a few now. The limitationss set forth in this bill seem reasonable and not onerous, in my opinion. We all know they'll be ignored by a percentage of these users, but this bill gives some teeth to enforcement, so the consequences are on them. Too many people act as if they are the only vehicle on the road!
