

Submitter:

David Labby

On Behalf Of:

Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4134

To the House Committee on Revenue:

I am a 5th generation Oregonian who has a long and deep connection to many parts our State. Our environment is already stressed from climate change and is likely to undergo dramatic and some likely catastrophic levels of stress. We absolutely need to support the biodiversity that has made Oregon what it is, whether in natural resources or in what remains of the State's original animals and plants. This bill will create a funding stream to help maintain that biodiversity. It is a small tax in the face of great need. Please support passage of this bill.
