House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

These are not "gun safety laws" being fronted by the supermajority DNC/DSA Uniparty legislature, they are red herrings, designed and inserted into the legislative process to distract from Salem's Lot of ineffective "Leadership", driving our state towards bankruptcy and social disorder. There's really nothing the minority party can effectively do to put the brakes on this seditious behaviour, other than having the political sand to deny the quorum, not currently a likely scenario, and only the Citizenry VOTING, will bring about any meaningful change to the downward spiral of a once thriving, peaceful, harmonious State of Oregon. The DNC/DSA Uniparty is frankly terrified and back on their heels regarding the primaries May 19th and Midterms November 3rd. The absolute disaster of what this body politic has created both fiscal and social, is so far beyond the pale, it defies logical, reasonable definition. This HB 4145 is a gift from the power elite of Salem's obedient "leadership", to the big money national and international donors and special interest orgs. whose purse strings tighten when their will isn't obeyed. The majority party does not serve the average Citizens of Oregon in any meaningful fashion, but thrives on performative smoke screens to achieve their goals. HB 4145 is just such a smoke screen
