

Submitter:	Sally Klein
On Behalf Of:	The 2nd Amendment
Committee:	House Committee On Judiciary
Measure, Appointment or Topic:	HB4145

Privileged class vs The People? And make us pay for you to impose it ??

How many twists and turns is this legislature capable of taking to defy both the state and US Constitution?

Apparently as many as it likes to keep Oregon going as far down the Socialism hole as possible. Guaranteeing no resemblance of what a great state we use to be.

HB 4145 is yet another example of Blue Madness.

Committee Members: you saw how weary so many people in Oregon truly are of your wallet digging and now, recent voting obfuscating. (An attempted May vote on the ODOT tax indeed, instead of November.)

The recent effort by which a quarter of a million citizens said no to your willingness to over tax us should have been heard. You don't for a minute believe the numbers who would have signed that petition aren't triple or beyond, do you??

And now, HB 4145 is another example of the same. You are just trying to reach into our pockets any way you can. And given the way this Bill is being slided into the system, you once again show your true colors. You want to divide us up and take more of our earnings for continuing wild ideas.

You are witnessing the crumbling of Oregon businesses, major corporate exodus, tax paying citizen evacuations due to your lack of respect, the encouraging of riots in the streets. And with glee, you seem to revel in limiting law abiding citizens protection against the very dangers you are enhancing for us. The state is falling apart at YOUR hand.

And Portland? Just the name of that city is enough to make most Americans with common sense cringe or laugh with relief that they don't live anywhere near it. I have had paid offers to travel there but won't, and haven't stepped foot in the city's pit for over 15 years. You've killed any and all positive ambiance.

STOP trying to end the Constitutional Rights of Oregonians, or what's left of them with your endless Bills that are nothing more than your firearms obfuscating talking points. Like many of the other anti gun Bills, HB 4145 does NOT address the underlying issues of your failures to address crime. While simultaneously, you happily

make law abiding citizens dangerously vulnerable to the criminals, drug users, and insurrectionists that you seem more eager to protect.

HB 4145, (nor 114) are any solution to prevent criminal use of firearms in Oregon. And neither is the present majority ruling party in this state. And adding privilege to others over the citizens is a prime example of your insulation from reality, fairness and our Constitutional Rights.

Oregon Citizens: excuse my making multiple points here but please, find one of the petition signing options that allow us to vote on ending Mail in Ballots fraught with potential and proven fraud, and look for the other circulating petitions on Legislative audacities that are being proposed RIGHT NOW.

No to HB 4145

NO to politicians spitting on our 2nd Amendment and both the Oregon & US Constitution yet again. You've found no Oath to this Country or state you aren't willing to step on.
