House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

This bill just like measure 114 does absolutely nothing to reduce crime. All this will accomplish is turn law abiding citizens into criminals or easy targets for those who already don't abide by the laws. 4145 will prohibit me from protecting my family, will prohibit my family from protecting themselves, and puts my daughters in a place that they can not lawfully carry a firearm in this world where every day is becoming more and more dangerous. Do we really believe that the criminals who are already breaking the law will stop because we added one more law? No, at least I don't see how any rational person could believe so. This bill was put in place by people who don't like guns to prevent responsible gun owners from having them. This absolutely ridiculous. The second amendment clearly states that every American citizen has the right to bear arms. If you don't want to, you don't have to. But why should someone who doesn't want to, be able to tell me what I can have? Shall not be infringed means that you can't tell me I have no right to bear arms. This waiting period, a right delayed is a right denied. EVERYTHING about this bill strips me and my loved ones along with so many more good, law abiding citizens from their right to bear arms. Guns aren't the problem, people are the problem. We have mental health issues in our country and no one wants to address the issue. Had we spent this wasted money from measure 114 all the way through to this new hb4145, we could have made a big difference by now. Let's fix the real problem instead of throwing a bandaid on a wound that will only hurt the people that aren't the problem instead of fixing the problem.
