Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

In an age where the government has begun to overreach into our lives, you are trying to take a tool from us that prevents that overreach. Making LEO's exempt from this bill shows the people where you stand, you are happy to allow the boot to fall on our necks while you can stand above the problem. Joining with California and Washington banning any type of firearms does not solve the problem of right wing violence that precipitates these bills. Focus instead on social programs to uplift the youth, teach them proper weapons training instead of letting Call of Duty do it for you. Bans won't work, criminals will have the weapons we legal law abiding citizens are denied thanks to your efforts.

I also stand with the communities that could benefit from protection, adding additional monetary barriers to ownership does not serve the communities. In addition, there are no methods of ensuring that abuse does not happen. Will trans folks be denied firearms? Will liberal folks be denied thanks to the database you want to keep on who owns what? In a world with so many sets of data collected on all of us, you strive to make it easier to target minority communities that would benefit from having protection.

Shame on you all, do not pass this bill.
