HB4145

Here we go again yet another ill conceived attempt to harass and deny law abiding gun owners of second amendment rights. Will this bill add any penalties to the criminals who unlawfully commit crimes with a firearm? No of course not! Time and time again we lawful gun owners have to deal with this crap. While criminals get a pass. How about so called common sense gun laws with actual common sense. Not to mention how is this going to be funded? The state's budget is not going to afford all this but I'm sure that the legislature will be going after the kicker to fund this boondoggle. Here's a novel concept how about working with law abiding gun owners to come up with viable realistic solutions instead of cramming more of this ?? crap down our throats.
