Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4138

All law enforcement members need to identify themselves with proper, government issued ID, as well as be identifiable (no masks, sun glasses or other items covering their features unless medically required). People feel they are being kidnapped, and if they aren't already, they can and will be unless rules of identification are enforced.

The same holds for warrants (judicial - signed by a judge!) and the need to follow the laws when it comes to entry to private property.

Lastly, our state and local governments need to respect their citizens' and legal non-citizens' rights to privacy and protect our vulnerable information.

Thank you.
