

Public Testimony in Support of HB 4086

January 30th 2026

Support for HB 4086 - 100% Fish & Industrial Symbiosis

Chair Nguyen, Vice-Chair Diehl, Vice-Chair Isadore, and Members of the Committee,

My name is Roi Wurgaft, and I urge you to vote **YES** on HB 4086.

I am the owner of Wurgaft Consulting & Development LLC, an advanced extraction and ingredient development facility located in Reedsport, Oregon. Our work focuses on transforming underutilized marine and biological materials into high-value ingredients for food, health, cosmetic, and industrial markets.

HB 4086 supports the 100% Fish approach by enabling research, infrastructure, and coordination needed to turn existing fish byproducts into higher-value uses.

The bill's focus on Industrial Symbiosis further strengthens coastal and rural economies by connecting waste streams to new manufacturing and innovation opportunities.

HB 4086 is a smart investment in economic development, sustainability, and innovation. I respectfully urge your support.

Sincerely,

Roi Wurgaft
