House Committee On Revenue

Measure, Appointment or Topic:

HB4134

Hi there. My name is Ciel Sander and I want to state my support for HB 4134. I have spent over a decade working and living in Oregon in the outdoors where I saw the power of nature heal individuals and families. Oregon must find funding models to support the conservation and management of the natural resources including landscapes, biodiversity, wildlife and management planning and conservation for the future. Dedicated funding must be delivered in order to ensure projects can be delivered on a consistent basis without worrying about future costs, research into wildlife and land management must have dedicated funding for long term science research. I live in British Columbia now and know that the BC Government needs to look to Oregon for how to do a lot of things - mainly just because you do them better. Your support of HB 4134 would set a guideline for other governments to follow your leadership to proactively protect biodiversity, reduce wildfire risk, support wildlife stewardship, and sustain healthy ecosystems

Thank you for the opportunity to comment. Ciel Sander
