Please create additional support for wildlife in Oregon. We know the Federal Govt is doing everything in its power to weaken or destroy environmental protections; and in this era to have a bipartisan fair measure such as this is not only hugely important, but it shows us where our commonalities intersect. If you live in Oregon you know that the reason Oregon is so unique is our landscape and its wildlife. Please support this measure. It is absolutely demoralizing to see politics so fragmented and hamstrung. As a concerned citizen, I know we can do better.
