HB4134

Hi,

HB 4134 is an important step to supporting wildlife and habitat in Oregon. The small amount levied on tourism is minuscule and inconsequential. The last year has seen the environment targeted for liquidation and resource extraction by the Federal Government. As a lifelong Oregonian I support this bill's passage. This is a good start to balancing the scales on a local (statewide) level. Where I live (Estacada foothills) post wildfire I have seen the backcountry environment diminished by a huge amount due to fire destruction and subsequent salvage logging, as well as climate change impact. I think some justice for wild life and habitat is in order.

Thanks, Ronald Gillilan
