HB4007

I don't want the faster ebike to have a fine opposed if someone buys or sells them that's stupid I want to be able to write a faster bike if I want to write a faster bike and I get in trouble for it it's on me. I mean of course kids should wear helmets that's a duh. And I've been he bikes for years and I've been hit by a car two cars and a bus how much are important but if the bikes can go faster you're actually safer it seems like to me because you can get away from cars and stuff quicker and scoot out of the way. This whole thing needs to be re thought out.
