

Submitter: Gary Guttormsen  
On Behalf Of:  
Committee: House Committee On Revenue  
Measure, Appointment or Topic: HB4134

Dear House committee members,

Thank you so much for allowing all Oregonians the opportunity to voice their support for this historic and extremely important piece of legislation. Like most Oregonians, I value the natural qualities that define our incredible State. Living in Sisters, I am literally at the hub of the State. From here I can travel any number of directions and explore the many natural ecosystems that are present here. I have been aware for many years that there are many plants and animals that are part of those habitat areas that are in danger of extinction unless we act to protect them. HB 4134 has the potential for doing that very thing. I urge you to pass this historic bill and let the nation and world know that Oregon is taking these threats seriously and is doing to do everything we can to turn these threats around, turning them into victories!

Thank you so much for considering my testimony in strong favor of this legislation.

Gary Guttormsen,  
Sisters, Oregon
