I am writing you in opposition to HB4145.

MZ114 was so poorly written from the start that you are once again attempting a fix to please the special interests that control the legislature.

This is not about what is best for the state, it is about control by outside interests that write checks to campaigns.

4145 also creates 2 classes of citizens in the state. Retired law enforcement will be exempt from the "yet to be created permitting process".

So those of lower income level that need a firearm for protection will be subject to the ridiculous fees and wait period while others get a pass.

"Fair and equitable I see."

When reading the Bios of the committee members here is what you folks say, (get involved, call me, fair, working family needs, busy, and safety)

I see that the overwhelming testimonies were in opposition. let's just see how the words you say go with the deeds. Real Oregonian's are opposed.

thank you
