Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4134

As an Oregon resident on the southern coast I strongly support this bill. You have heard from others the multiple reasons why this bill is so important but I would like to add that the marine ecology here is a huge part of what makes Oregon so attractive both of those of us who live here and the many tourists that support our region. We can proudly proclaim as a state that we have done this to protect this most valuable resource and encourage others to come see it for themselves.
