

Submitter:

Christy Hudson

On Behalf Of:

Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4125

The secret is out. Oregon's got a revenue problem. This impacts a variety of services Oregonians need and expect our state government to provide, access to high quality, public education being the number one priority. The evidence is clear - investments in children create a predictable return on investment. We are failing students in K-12 settings as indicated by a long list of state and national measures. Increased accountability from schools and districts is needed, as is additional funding. This is a BOTH/AND solution. Please pass HB4125, ensuring increased resources for our children's education for year to come.
