House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

The 2A was specifically intended to prevent the Government from violating our rights. As we watch the ICE enforcement it should become patently obvious why this is such an important Human Right. All governments have acted tyrannically from time to time. Enshrining this right in our constitution is what makes the United States unique in that its citizens ultimately hold the power to resist. Do not weaken or take away this right in the name of "peace" for that "peace" will be short lived.
