Measure, Appointment or Topic:

HB4145

Please support HB 4145. We know that lives will be saved. Research shows that most people do not switch to another method if their preferred way to attempt suicide is unavailable. And without access to a gun they're much more likely to survive. The use of a gun is lethal in 90% of cases. Implementing M114 will be time and space between someone who is suicidal and a gun and that will be life saving. Thank you for this opportunity.
