Committee: House Committee On Behavioral Health
Measure, Appointment or Topic: HB4083

I oppose this bill - HB 4083 as not all Social Worker are in the mental health profession and requiring additional supervision. This should be an OPTIONAL requirement for any social worker who CHOSE to provide mental health services. Social workers who chose to pursue their LCSW already is requiring to do supervision while being CSWAs so why add further supervision especially if it involves additional hours outside of our jobs (plus not everyone could afford to cover multiple supervision services)!
