Measure, Appointment or  
Topic:

HB4080

I strongly support HB 4080. Many homes in Portland do not have suitable roofs for a full-scale solar installation, and this bill will allow them to benefit from solar energy. I personally own a rental home, our first home when we moved to Portland, with such a roof. If this bill becomes law, I intend to provide my current tenants with the 1200 Watts of solar panels the bill allows.
